

PES UNIVERSITY, BANGALORE
Department of Computer Science and Engineering
SOFTWARE ENGINEERING – LEVEL 3 MINI-PROJECT
DELIVERABLE 1 – SYNOPSIS / PROJECT PROPOSAL

1.1 Project Title and Group

Field	Entry
Project Title	CampusReady – Online Internship & Placement Preparation Portal
Group / Team Number	Team 12
Course	UE24CS341A – Software Engineering
Technology Stack	Python / JavaScript — MERN Stack (MongoDB, Express.js, React.js, Node.js)
Complexity	Medium
Customer / Stakeholder	College Training & Placement Office (TPO), participating recruiters, and students

1.2 Team Profile and Product Ownership

Member	SRN	Owned Functionality	Secondary Responsibilities
SEJAL SIDDAPURAM	PES1UG24CS426	Student registration, login & profile management	API review
SAMPATH	PES1UG24CS416	Internship/job listing, search & filtering, application submission	UI/UX
SAGAR A WALIKAR	PES1UG24CS396	Recruiter portal: post listings, view & shortlist applicants	Database design
Saiesh Shankar	PES1UG24CS401	TPO admin dashboard, mock aptitude/interview practice module & notifications	Testing/CI

1.3 Problem Statement

Students currently rely on scattered, disconnected sources — college notice boards, generic job portals, and word of mouth — to discover internship and placement opportunities. There is no single place for a student to build a profile, apply to relevant openings, and track application status. Recruiters and the college Training & Placement Office (TPO) similarly lack a lightweight, dedicated tool to post openings, screen applicants, and monitor placement statistics. Students also have limited access to structured preparation resources (aptitude tests, mock interviews) closely tied to the opportunities they are applying for. CampusReady aims to digitize and centralize internship/placement discovery, application tracking, recruiter management and placement preparation in one portal.

1.4 Objectives

- Provide a single platform where students can discover and apply to internship/placement opportunities.
- Allow students to build and maintain a profile/resume within the portal.
- Give students real-time visibility into their application status.
- Give recruiters a dashboard to post openings and manage/shortlist applicants.
- Give the TPO/admin a way to onboard companies, moderate postings and view placement analytics.
- Offer students practice resources (mock aptitude tests / interview questions) to prepare for placements.
- Develop the product incrementally using Agile practices with regular sprint demos.

1.5 Functional Features

- Student registration, login and profile/resume management.
- Internship/job listing browsing, search and filtering.
- Application submission and status tracking (Applied / Shortlisted / Rejected / Selected).
- Recruiter portal: post internship/job listings, view and shortlist applicants.
- Mock aptitude test and interview-preparation practice module.
- Admin/TPO dashboard: manage companies and students, moderate postings, view operational reports.
- Notifications (in-app/email) for application deadlines and status changes.

1.6 Short-Term Plan

Iteration	Planned Output	Acceptance Evidence
Sprint 1	Project setup, requirements baseline, student registration/login	User stories + Git repo + working login
Sprint 2	Student profile/resume, internship listing & search	Demo + unit tests
Sprint 3	Application submission & tracking workflow	Integration tests + PRs
Sprint 4	Recruiter portal: post listings, shortlist applicants	System demo + test evidence
Sprint 5	Admin dashboard, mock test module, notifications, security hardening	Validation + coverage report
Sprint 6	System validation and release	Final report + deployment/demo
